

Clif High Introduction

by: Jim Costa
6/21/2023

Note: All the below work is from my memory, not current research.

General:

To me, Clif is a self educated genius. He is about 65 years of age, living with his ailing wife on the Pacific coast of Washington. He currently freely produces podcasts informing us of coming information, actions and general information about the Collapse and Reset of our government as the Elites controlling the planet collapse.

The last part of this Introduction will be most important to you, that being his personal research on cure for his 30 year bout with cancer.

Youth:

Clif was an army brat that moved with his family every year. He had few childhood friends as a result.

His father was a decorated Korean War hero, a Master Sargent that got a ticket to becoming an officer. He was sent to the Army War College.

Clif was an avid reader. He says he was so bored he read all of his father's war materials, as though he too was in War College. He read top secret documents as a result.

I do not believe he attended college. I get the feeling he was a self taught computer programmer, as many successful people at that time were.

Early Career:

Clif gained a reputation as a sharp programmer and did consulting work for large corporations improving their in-house software.

Alto Report:

Beginning around 2010, Clif became known to "Conspiracy Theorists" watching the coming Collapse and Reset of the global powers and their systems that are now apparent to many.

Clif authored a unique software program that searched the internet in general gathering information on certain "Search Words" for: Raising or lowering in frequency of use; Frequency and change of emotions around those words, etc. He published a monthly Half Past Human ALTO Report sharing his findings.

ALTO = asymmetric language trend analysis. See Also [Web Bots](https://en.wikipedia.org/wiki/Web_Bot)
https://en.wikipedia.org/wiki/Web_Bot

Premonitions:

The above is a mouthful of bazaar descriptions, but the U. S. Military ended up purchasing his program. What Clif did was recognize that we all have the power to receive premonitions from the future, whether we realize it or not. Some see far out while others see the closer we get to an event of great news worthiness. That is why his software is searching for increasing of “emotional words“ then the decline of frequency of those words. The decline helps him determine the time line of such an event.

Example:

If his program had been written prior to the collapse of the Twin Towers in New York, several years prior to the event he would have noticed an increase in “Twin Towers” and “Collapse” simultaneously. Many communications were by people not understanding why they were using those words – they just came out. The increasing intensity and then decline of the words would have lead him to a major event coming around 9/11/2001.

Past 20 Years:

Clif stopped producing his ALTO report after the U.S. Government altered our use of certain language words as a result of WOKEism coming and to scare persons from appearing as terrorists to our government. An example is pod castors who are reluctant in saying “Covid” lest their podcasts be removed by YouTube.

Because in the change of language, he stopped monitoring the internet and instead has been re-analyzing the old data runs, now using past successful interpretations to gleam more information from those older data runs, now that he understands some of the strange words he encountered.

Therefore, his current podcasts are strengthening his time-lines and probabilities.

Personal Cancer Cure:

Clif had undiagnosed digestive system cancer for 30 years. Once diagnosed he dropped from his usual 175 pounds to a near death 100 pounds. Out of desperation he fired his Oncologists and began his own research and healing process. He is now cancer free and back to 175 pounds.

On his own he read medical books and as well as alternative healing practices. He had to learn from his body how to feed it foods that it could tolerate and digest, bringing his system back to a natural state.

Personal Recommendation:

I have followed all of Clif's work since his first ALTO report. Because his reports were like reading a foreign language and learning new computer codes all at the same time, the reader was able to get into Clif's head. You were not just reading his conclusions, you were thinking along side of him. One could then get to know him on somewhat of a personal level. This is what happened to me.

I fully trust Clif as if is my own brother.
